

ABSTRACT

A method of manufacturing powder puff is provided. First, a plurality of moulds of different sizes is provided. A smaller mould is used to form a powder puff block. Next, the powder puff block is placed into a mould cavity of a larger mould. Next, a different colored powder puff material charged into the mould cavity of the larger mould. Next, the different colored powder puff material and the powder puff block are heated after the powder puff material solidifies in the mould cavity to fuse the different colored powder puff material and the powder puff block to form a one-piece powder puff log. Next, the one-piece powder puff log is cut to obtain a plurality of pieces of raw-powder-puffs. The raw-powder-puffs are polished to obtain finished-puffs.
